## Simple Steps to Setup Eclipse Dirigible on Tomcat

1

Download ROOT.war  
for Tomcat from  
<http://download.dirigible.io>.

Configure the Users store  
under `$CATALINA_HOME/  
conf/tomcat-users.xml`

2

3

Start the Tomcat  
server.

Open a web browser and go  
to <http://localhost:8080/>

4

5

Login with user dirigible and  
password dirigible.

FINISH
